GOZFANIZER

APPLICATION

The perfect combination of quality,
aesthetics and functionality.

**Just
pick.**

A real statement.

Anywhere!

Our golf club stand has been specially developed for serious golfers who value a tidy and functional equipment.

Whether for indoor golf or for stylish storage at home: with its well thought-out construction, high-quality materials and minimalist design, the Golfanizer is not only pure efficiency, but also an aesthetic gem.

Comfort.
Style.
Control.

Perfection in the golf simulator.

Quick access

Perfectly arranged clubs reduce the need for tedious searching and enable a seamless club change for maximum efficiency.

ErgonomicsPlus

The intelligent design makes every club change a comfortable experience.

Perfection in the golf simulator. And at home.

Mobility

With its lightweight, stable design, the position of the Golfanizer can be easily and individually adjusted to the player's needs, even when loaded.

Tidy

With space for up to 15 clubs, the Golfanizer offers unique flexibility that covers all individual club setups. For instance, there is also space for alignment sticks or even the unplayable 1 iron.

Design meets functionality

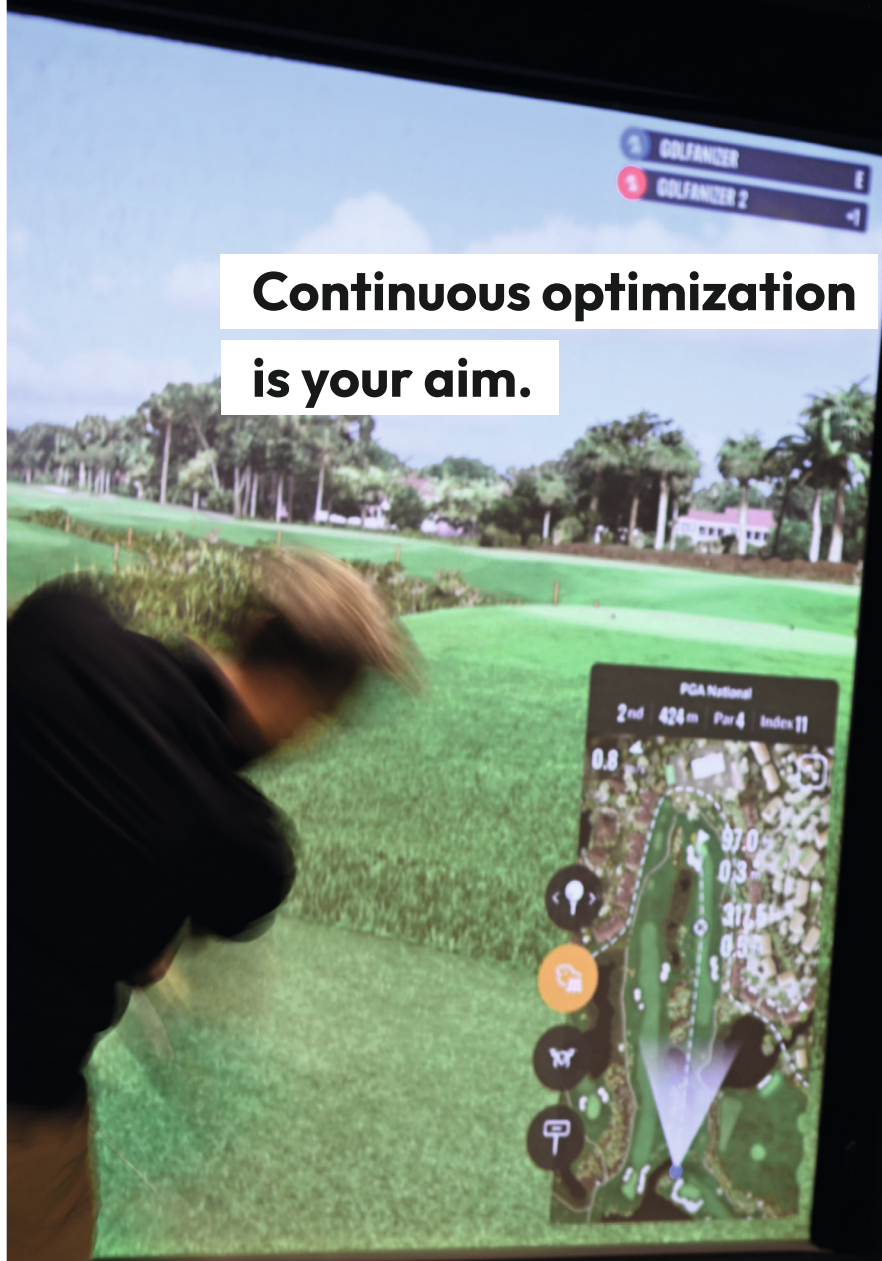

The purist design not only ensures a tidy appearance, but also aesthetically enhances your golf environment.

Gentle on the equipment

Unlike a golf bag, the Golfanizer prevents club-on-club contact, keeping your equipment in top condition.

**Continuous optimization
is your aim.**

And when is it time for
your golf simulator
setup?

GOLFANIZER

U N I Q U E

The Golfanizer embodies German craftsmanship and engineering, in which precision, design and sustainability are perfectly combined.

GOLFANIZER

A natural standard: solid wood.

Elegance

The solid wood gives the Golfanizer a timeless and high-quality look that perfectly matches the sophisticated golf environment. It underlines the appreciation for the game and for your own equipment.

Wellbeing

Wood is a “feel-good material” that offers a pleasant experience thanks to its natural structure and a warmer surface.

Robustness

High-quality wood is durable and resistant.

Individuality

The unique grain of the wood gives each Golfanizer its own individual character, making it unmistakably unique.

Sustainability

Our wood comes from regional forestry. In doing so, we contribute to environmentally friendly production and support the local economy.

UNIQUE

Oak

One of the most traditionally rich and versatile types of wood in Europe. With its striking grain and warm coloring, it embodies natural strength.

GOLFANIZER

Walnut

With its deep brown, slightly chocolaty heartwood and elegant texture, it is the epitome of natural beauty and timeless elegance.

Protection and feel.

The soft matt finish of the steel sheets was chosen with a clear focus on protecting the material and ensuring durability. Our high-quality finish not only ensures functionality, but also underlines the premium character of the Golfanizer with its matt velvety surface.

Resistance

The coating is resistant to minor impacts, making the Golfanizer ideal for long-term use.

Soft Feel

Outstanding feel when laying the club down.

Safety

The precise geometry of the club slots ensure safe and gentle placement of your clubs.

GOLFANIZER

By golfers. For golfers.

Manufactured in Germany according to the highest quality standards, the Golfanizer combines traditional craftsmanship with modern design.

Development

The idea and functionality of the Golfanizer originated in the Heilbronn region, which has been synonymous with engineering and technological innovation for decades. Due to its close connection to the automotive industry, this region promotes the highest precision and quality standards.

Handcrafted

Each model is handmade in Germany. The use of regional materials and cooperation with regional experts guarantee a product that meets the highest standards.

Design

The purist and therefore timeless design combines aesthetics with functionality - tailored to the needs of golfers who value style and quality.
